## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry, through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Inorganic Chemical Industry Association (JICIA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS K 1474**:2007 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

## Test methods for activated carbon

### 1 Scope

This Japanese Industrial Standard specifies the test methods for activated carbon for industrial use.

### 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

- JIS H 3100 *Copper and copper alloy sheets, plates and strips*
- JIS H 5120 *Copper and copper alloy castings*
- JIS K 0050 *General rules for chemical analysis*
- JIS K 0102 *Testing methods for industrial wastewater*
- JIS K 0115 *General rules for molecular absorptiometric analysis*
