This Recommended Practice was prepared by and is under the jurisdiction of Working Group 22 of the IEST Design, Test, and Evaluation Division (WG-DTE022). The following WG voting members contributed to the development of this edition of this Recommended Practice.

Tony Keller, WG-DTE022 Chair, Spectral Dynamics

Brad Allen, Moog CSA

Robert L. (Andy) Anderson, National Technical Systems

Russ Ayres, Spectral Dynamics

David Banaszak, US Air Force Research Laboratory

Richard Cellary, NSWC IHEODTD Naval PHST Center

William H. Connon III, US Army Aberdeen Test Center

Michael T. Hale, Redstone Test Center

Joel Hoksbergen, Team Corporation

Samuel Kouretas, NSWC IHEODTD DET PICATINNY

Randy Patrick, Army Yuma Test Center

Stanley Poynor, Lockheed Martin Missiles & Fire Control

Thomas Reilly, Data Physics Corporation

Ken Salomon, Raytheon Corporation

David O. Smallwood, Consultant

Kenneth Thompson, US Army

Wayne Tustin, Equipment Reliability Institute

Marcos A. Underwood, Tu'tuli Enterprises

Del Wilson, Boeing

Jon Wilson, Jon S. Wilson Consulting

PROPOSAL FOR IMPROVEMENT: The Working Groups of the Institute of Environmental Sciences and Technology are continually working on improvements to their Recommended Practices and Reference Documents. Suggestions from users of these documents are welcome. If you have a suggestion regarding this document, please use the online Proposal for Improvement form found on the IEST website at www.iest.org.

NOTICE AND DISCLAIMER: This Recommended Practice is published by the Institute of Environmental Sciences and Technology (IEST) to advance the technical and engineering sciences. Use of this document is entirely voluntary, and determination of its applicability and suitability for any particular use is solely the responsibility of the user. Use of this Recommended Practice does not imply any warranty or endorsement by IEST.

The information in this publication was considered technically sound by the consensus of persons engaged in the development and approval of the document at the time it was developed. Consensus does not necessarily mean that there is unanimous agreement among all persons participating in the development of this document.

IEST standards, recommended practices, and guideline publications, of which the document contained herein is one, are developed through a voluntary consensus standards development process. This process brings together volunteers and seeks out the views of persons who have an interest in the topic covered by this publication. While IEST administers the process to promote fairness in the development of consensus, the organization does not write the document and does not independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in IEST standards, recommended practices, and guideline publications.

IEST disclaims liability for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. IEST disclaims and makes no guaranty or warranty, express or implied, as to the accuracy or completeness of any information published herein, and disclaims and makes no warranty that the information in this document will fulfill any of the particular purposes or needs of users of the document. IEST does not guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide.

In publishing and making this document available, IEST is not undertaking to render professional or other services for or on behalf of any person or entity, nor is IEST undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances. Information and other standards on the topic covered by this publication may be available from other sources, which the user may wish to consult for additional views or information not covered by this publication.

IEST has no power, nor does it undertake to police or enforce compliance with the contents of this document. IEST does not certify, test, or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of compliance with any health or safety-related information in this document shall not be attributable to IEST and is solely the responsibility of the certifier or maker of the statement.
