### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

#### IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

More than 60 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [csc@iec.ch](mailto:csc@iec.ch).

---

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Catalogue IEC - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

#### Recherche de publications IEC - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 15 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)

Plus de 60 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [csc@iec.ch](mailto:csc@iec.ch).

## CONTENTS

FOREWORD.....	16
INTRODUCTION.....	18
1 Scope.....	19
2 Normative references.....	19
3 Terms, definitions, abbreviated terms and acronyms .....	20
3.1 Terms and definitions .....	20
3.2 Abbreviated terms and acronyms.....	22
4 Conformance statement .....	22
5 Conventions .....	23
5.1 General.....	23
5.2 Conventions for lexical structure.....	23
5.2.1 ABC field1, field2 .....	23
5.2.2 ABC field1+ .....	24
5.2.3 ABC field2* .....	24
5.2.4 ABC [field1, field2]+ .....	24
5.2.5 ABC field1, (field2, field3)<exp> .....	24
6 EDD and EDDL model .....	24
6.1 Overview of EDD and EDDL .....	24
6.2 EDD architecture.....	24
6.3 Concepts of EDD .....	24
6.4 Principles of the EDD development process.....	25
6.4.1 General .....	25
6.4.2 EDD source generation .....	25
6.4.3 EDD preprocessing .....	26
6.4.4 EDD compilation .....	26
6.5 Interrelations between the lexical structure and formal definitions.....	26
6.6 Builtins .....	26
6.7 Profiles .....	26
7 Electronic Device Description Language (EDDL) .....	26
7.1 Overview.....	26
7.1.1 EDDL features .....	26
7.1.2 Syntax representation .....	27
7.1.3 EDD language elements.....	27
7.1.4 Basic construction elements.....	27
7.1.5 Common attributes.....	38
7.1.6 Special elements.....	38
7.1.7 Rules for instances .....	39
7.1.8 Rules for a list of VARIABLES.....	39
7.2 EDD identification information .....	39
7.2.1 General structure .....	39
7.2.2 Specific attributes .....	39
7.3 AXIS.....	42
7.3.1 General structure .....	42
7.3.2 Specific attributes .....	43
7.4 BLOCK .....	45
7.4.1 BLOCK_A .....	45

7.4.2	BLOCK_B .....	57
7.5	CHART .....	59
7.5.1	General structure .....	59
7.5.2	Specific attributes .....	59
7.6	COLLECTION .....	61
7.6.1	General structure .....	61
7.6.2	Specific attribute – item-type .....	62
7.7	COMMAND .....	62
7.7.1	General structure .....	62
7.7.2	Specific attributes .....	63
7.8	COMPONENT .....	69
7.8.1	General structure .....	69
7.8.2	Specific attributes .....	70
7.9	COMPONENT_FOLDER.....	75
7.10	COMPONENT_REFERENCE.....	76
7.11	COMPONENT_RELATION .....	76
7.11.1	General structure .....	76
7.11.2	Specific attributes .....	77
7.12	CONNECTION (void).....	80
7.13	DOMAIN (void).....	80
7.14	EDIT_DISPLAY .....	80
7.14.1	General structure .....	80
7.14.2	Specific attributes .....	81
7.15	FILE .....	83
7.15.1	General structure .....	83
7.15.2	Specific attributes .....	83
7.16	GRAPH.....	84
7.16.1	General structure .....	84
7.16.2	Specific attributes .....	85
7.17	GRID .....	86
7.17.1	General structure .....	86
7.17.2	Specific attributes .....	86
7.18	IMAGE.....	87
7.18.1	General structure .....	87
7.18.2	Specific attributes .....	88
7.19	IMPORT.....	89
7.19.1	General structure .....	89
7.19.2	Redefinitions.....	91
7.20	INTERFACE.....	107
7.20.1	General structure .....	107
7.20.2	Specific attribute – DECLARATION .....	107
7.21	LIKE .....	108
7.22	LIST .....	108
7.22.1	General structure .....	108
7.22.2	Specific attributes .....	109
7.23	MENU.....	110
7.23.1	General structure .....	110
7.23.2	Specific attributes .....	111
7.23.3	Sequence diagrams for actions.....	116

7.24	METHOD .....	118
7.24.1	General structure .....	118
7.24.2	Specific attributes .....	119
7.25	PROGRAM (void) .....	121
7.26	RECORD .....	121
7.27	REFERENCE_ARRAY .....	122
7.27.1	General structure .....	122
7.27.2	Specific attribute – ELEMENTS .....	122
7.28	Relations .....	123
7.28.1	REFRESH.....	123
7.28.2	UNIT.....	123
7.28.3	WRITE_AS_ONE .....	124
7.29	RESPONSE_CODES .....	124
7.30	SOURCE .....	125
7.30.1	General structure .....	125
7.30.2	Specific attributes .....	126
7.31	TEMPLATE .....	127
7.31.1	General structure .....	127
7.31.2	Specific attribute – DEFAULT_VALUES.....	127
7.32	VALUE_ARRAY .....	128
7.32.1	General structure .....	128
7.32.2	Specific attributes .....	128
7.33	VARIABLE .....	129
7.33.1	General structure .....	129
7.33.2	Specific attributes .....	130
7.34	VARIABLE_LIST .....	148
7.35	WAVEFORM .....	148
7.35.1	General structure .....	148
7.35.2	Specific attributes .....	149
7.36	Common attributes .....	155
7.36.1	CLASSIFICATION.....	155
7.36.2	COMPONENT_PARENT.....	156
7.36.3	COMPONENT_PATH .....	157
7.36.4	DEFINITION .....	157
7.36.5	EMPHASIS .....	158
7.36.6	HANDLING .....	158
7.36.7	HEIGHT .....	158
7.36.8	HELP.....	159
7.36.9	LABEL .....	160

7.36.18	PRIVATE .....	164
7.36.19	VISIBILITY.....	164

7.36.20	WRITE_MODE .....	165
7.36.21	IDENTITY .....	165
7.37	Conditional expression .....	166
7.38	Referencing .....	167
7.38.1	Referencing an EDD instance.....	167
7.38.2	Referencing bits of a BIT_ENUMERATED VARIABLE .....	168
7.38.3	Referencing members of a RECORD .....	168
7.38.4	Referencing elements of a VALUE_ARRAY .....	168
7.38.5	Referencing members of a COLLECTION .....	169
7.38.6	Referencing elements of a REFERENCE_ARRAY.....	169
7.38.7	Referencing members of a VARIABLE_LISTS.....	169
7.38.8	Referencing elements of BLOCK_A PARAMETERS .....	170
7.38.9	Referencing elements of BLOCK_A PARAMETER_LISTS .....	170
7.38.10	Referencing elements of BLOCK_A LOCAL_PARAMETERS .....	170
7.38.11	Referencing BLOCK_A CHARACTERISTICS .....	171
7.38.12	Referencing members of a FILE .....	171
7.38.13	Referencing elements of a LIST .....	171
7.38.14	Referencing members of a CHART .....	172
7.38.15	Referencing members of a GRAPH.....	172
7.38.16	Referencing members of a SOURCE .....	172
7.38.17	Referencing AXIS of a GRAPH, SOURCE, WAVEFORM .....	173
7.38.18	Referencing PARAMETERS of specific BLOCK_A instance.....	173
7.38.19	Referencing LOCAL_PARAMETERS of specific BLOCK_A instance .....	174
7.38.20	Referencing CHARACTERISTICS of specific BLOCK_A instance .....	174
7.38.21	Referencing CHARTS of specific BLOCK_A instance .....	174
7.38.22	Referencing LISTS of specific BLOCK_A instance .....	175
7.38.23	Referencing GRAPHS of specific BLOCK_A instance.....	175
7.38.24	Referencing GRIDS of specific BLOCK_A instance .....	176
7.38.25	Referencing MENUS of specific BLOCK_A instance.....	176
7.38.26	Referencing METHODS of specific BLOCK_A instance .....	177
7.38.27	Referencing COMPONENT instances .....	177
7.38.28	Referencing COMPONENT types .....	178
7.38.29	Referencing FILES of specific BLOCK_A instance .....	178
7.38.30	Referencing PLUGINS of specific BLOCK_A instance .....	178
7.39	Strings.....	179
7.39.1	Specifying a string as a string literal .....	179
7.39.2	Specifying a string as a string variable.....	179
7.39.3	Specifying a string as an enumeration value .....	180
7.39.4	Specifying a string as a dictionary reference.....	180
7.39.5	Referencing HELP and LABEL attributes of EDD instances .....	180
7.39.6	String operations.....	181
7.39.7	Prompt string formats.....	181
7.40	Expression.....	182
7.40.1	General structure .....	182
7.40.2	Primary expressions.....	182

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

### **FUNCTION BLOCKS (FB) FOR PROCESS CONTROL AND ELECTRONIC DEVICE DESCRIPTION LANGUAGE (EDDL) –**

#### **Part 3: EDDL syntax and semantics**

#### **FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61804-3 has been prepared by subcommittee 65E: Devices and integration in enterprise systems, of IEC technical committee 65: Industrial-process measurement, control and automation.

This third edition cancels and replaces the second edition published in 2010. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- Builtins and their profiles removed and relocated into IEC 61804-5.
- The following extensions are integrated in the EDDL specification to meet FDI requirements:
  - New constructs BLOB, PLUGIN.
  - Component construct for communication server requirements (additional attributes).

- Extension of the class attribute.
- New attributes PRIVATE, VISIBILITY, WRITE\_MODE
- The following changes will be integrated in the EDDL based on EDDL harmonization:
  - Removed some unused features.
  - Harmonized some profile features.

The text of this standard is based on the following documents:

FDIS	Report on voting
65E/451/FDIS	65E/462/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

Headings ending with '(void)' are used to retain the numbering of previous editions.

A list of all parts in IEC 61804 series, published under the general title *Function blocks (FB) for process control and Electronic Device Description Language (EDDL)*, can be found on the IEC website.

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

The EDDL fills the gap between the conceptual function block specification of IEC 61804-2 and a product implementation. It allows the manufacturers to use the same description method for devices based on different technologies and platforms. Figure 1 shows these aspects.

IEC 61804 has the general title "Function blocks (FB) for process control and Electronic Device Description Language (EDDL)" and consists of the following parts:

Part 2: Specification of FB concept

Part 3: EDDL syntax and semantics

Part 4: EDD interpretation

Part 5: EDDL Built-in library

Part 6: Meeting the requirements for integrating fieldbus devices in engineering tools for field devices

This part of IEC 61804 has integrated some parts of IEC TS 61804-1:2003, which was withdrawn in January 2013.

The EDDL may also be used for the description of product properties in other domains such as industrial automation. Industrial automation may include devices such as generic digital and analog input/output modules, motion controllers, human-machine interfaces, sensors, closed-loop controllers, encoders, hydraulic valves, and programmable controllers.

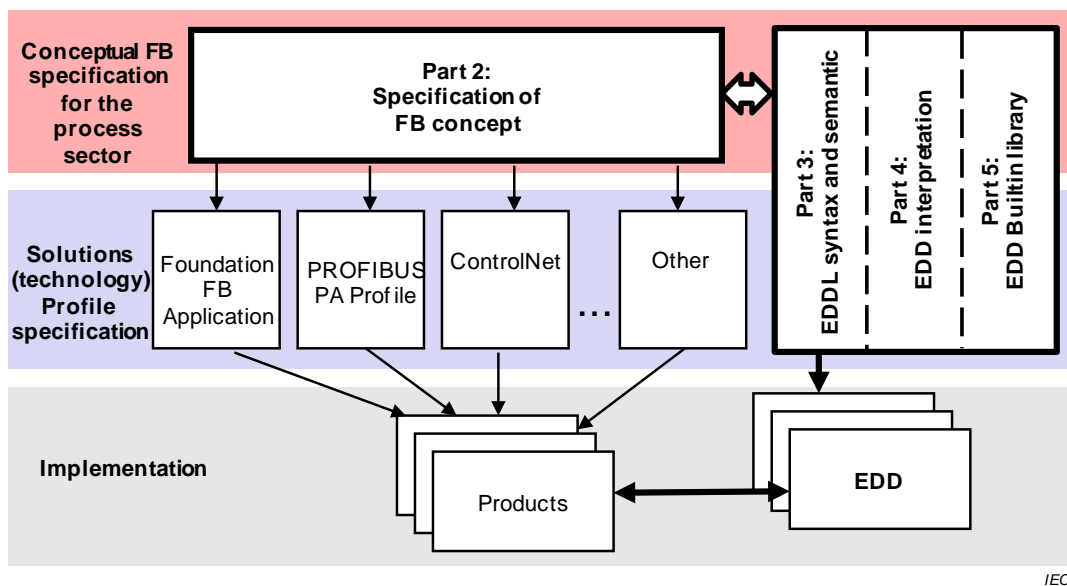

Figure 1 – Position of IEC 61804 in relation to other standards and products

# FUNCTION BLOCKS (FB) FOR PROCESS CONTROL AND ELECTRONIC DEVICE DESCRIPTION LANGUAGE (EDDL) –

## Part 3: EDDL syntax and semantics

### 1 Scope

This part of IEC 61804 specifies the Electronic Device Description Language (EDDL) technology, which enables the integration of real product details using the tools of the engineering life cycle.

This part of IEC 61804 specifies EDDL as a generic language for describing the properties of automation system components. EDDL is capable of describing

- device parameters and their dependencies;
- device functions, for example, simulation mode, calibration;
- graphical representations, for example, menus;
- interactions with control devices;
- graphical representations:
  - enhanced user interface,
  - graphing system;
- persistent data store.

EDDL is used to create Electronic Device Description (EDD) for example concrete devices, common usable profiles or libraries. This EDD is used with appropriate tools to generate an interpretative code to support parameter handling, operation, and monitoring of automation system components such as remote I/Os, controllers, sensors, and programmable controllers. Tool implementation is outside the scope of this standard.

This part of IEC 61804 specifies the semantic and lexical structure in a syntax-independent manner. A specific syntax is defined in Annex A, but it is possible to use the semantic model also with different syntaxes.

### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
