Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Suga Weathering Technology Foundation (SWTF)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14. Consequently **JIS L 0850:1994** is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

Test method for colour fastness to hot pressing

Introduction

This Japanese Industrial Standard has been prepared based on the fourth edition of **ISO 105-X11** published in 1994 with some modifications of the technical contents to correspond to actual situation of test and assessment in Japan.

The portions given sidelines or dotted underlines are the matters in which the contents of the corresponding International Standard have been modified. A list of modifications with the explanations is given in Annex JA.

1 Scope

This Standard specifies the test method for colour fastness of dyed textiles to hot pressing.

NOTE : The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 105-X11 : 1994 *Textiles — Tests for colour fastness — Part X11 : Colour fastness to hot pressing* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and **JIS** are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21-1**.

2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS K 0557 *Water used for industrial water and wastewater analysis*

JIS L 0105 *General principles of physical testing methods for textiles*

NOTE : Corresponding International Standard : ISO 139 *Textiles — Standard atmospheres for conditioning and testing* (MOD)

JIS L 0801 *General principles of testing methods for colour fastness*

NOTE : Corresponding International Standard : ISO 105-A01 *Textiles — Tests for colour fastness — Part A01 : General principles of testing* (MOD)

JIS L 0803 *Standard adjacent fabrics for staining of colour fastness test*

NOTE : Corresponding International Standard : ISO 105-F02 *Textiles — Tests for colour fastness — Part F02 : Specification for cotton and viscose adjacent fabrics* (MOD)

JIS L 0804 *Grey scale for assessing change in colour*
