## **Foreword**

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by The Japan Belting Manufacturers Association (JBMA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

# V-belts and V-ribbed belts— Test method for determination of centre distance variation

## Introduction

This Japanese Industrial Standard has been prepared based on the second edition of **ISO 9608** published in 1994 with some modifications of the technical contents.

The portions given sidelines or dotted underlines are the matters in which the contents of the corresponding International Standard have been modified. A list of modifications with the explanations is given in Annex JA.

## 1 Scope

This Standard specifies a test method for determining the centre distance variation of classical V-belts specified in **JIS K 6323**, narrow V-belts specified in **JIS K 6368**, and V-ribbed belts specified in **JIS B 1858**.

NOTE : The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 9608:1994 *V-belts—Uniformity of belts—Test method for determination of centre distance variation* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and **JIS** are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21-1**.

## 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS B 1858 *Belt drives—Pulleys and V-ribbed belts for industrial applications*

JIS B 1860 *Belt drives—V-belts and V-ribbed belts, and corresponding grooved pulleys—Vocabulary*

JIS K 6323 *Classical V-belts for power transmission*

JIS K 6368 *Narrow V belts for power transmission*

JIS Z 8401 *Guide to the rounding of numbers*

## 3 Terms and definitions

For the purpose of this Standard, the terms and definitions given in **JIS B 1860**, and the following apply.
