About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

FOREWORD.....	7
INTRODUCTION.....	9
1 Scope.....	10
2 Normative references	12
3 Terms, definitions, abbreviated terms, acronyms, conventions and symbols	13
3.1 Terms and definitions.....	13
3.2 Abbreviated terms, acronyms, conventions and symbols.....	18
4 Compliance and type tests.....	19
4.1 Compliance with this standard	19
4.2 Type tests	20
4.2.1 General	20
4.2.2 Equipment to be tested (equipment under test/EUT).....	20
4.2.3 Special features for EMC tests	23
4.2.4 Withstand test conditions.....	23
4.2.5 Climatic tests.....	23
4.2.6 Functionality verification with temperature	23
4.2.7 Verification procedure.....	27
4.2.8 Requirements for test programmes and proper functioning verification procedures (PFVPs) to be provided by the manufacturer	28
4.2.9 EMC Performance criteria.....	28
4.2.10 General facility/laboratory conditions for tests	29
4.3 Test report.....	29
5 Normal service conditions and requirements.....	30
5.1 General.....	30
5.2 Operating conditions and requirements.....	30
5.2.1 Ambient temperature and relative humidity	30
5.2.2 Altitude	34
5.3 Mechanical operating conditions and requirements	35
5.3.1 General	35
5.3.2 Vibrations	35
5.3.3 Shock	36
5.3.4 Free falls (portable and hand-held equipment).....	36
5.4 Transport and storage conditions and requirements	37
5.4.1 General	37
5.4.2 Ambient temperature and relative humidity	37
5.4.3 Altitude	39
5.4.4 Free falls (in manufacturer's original packaging).....	39
6 Functional requirements	40
6.1 General.....	40
6.2 Power input ports.....	41
6.2.1 Requirements	41
6.2.2 Verification of power input ports (a.c. or d.c.).....	42
6.3 Memory power back-up.....	46
6.3.1 Requirements	46
6.3.2 Verification of memory power back-up requirements.....	46
6.4 Digital I/Os.....	48

6.4.1	General	48
6.4.2	Positive logic digital I/Os (sinking inputs / sourcing outputs)	48
6.4.3	Negative logic digital I/Os (sourcing inputs / sinking outputs)	48
6.4.4	Digital inputs (positive logic, current sinking)	49
6.4.5	Digital outputs for alternating currents (positive logic, current sourcing)	52
6.4.6	Digital outputs for direct current (current sourcing)	57
6.4.7	Requirements for discrete channel compatibility with IEC 61131-9 SDCI	61
6.4.8	Special digital I/O interfaces	61
6.5	Analog I/Os	61
6.5.1	General	61
6.5.2	Analog inputs	61
6.5.3	Analog outputs	61
6.5.4	Analog temperature inputs	62
6.5.5	Requirements for analog channel compatibility with HART® (Highway Addressable Remote Transducer)	62
6.5.6	Verification of analog I/Os	62
6.6	Communication interface requirements	64
6.6.1	General	64
6.6.2	Verification of communication interface requirements	64
6.7	Main processing unit(s) and memory(ies) requirements	64
6.7.1	General	64
6.7.2	Verification of processing unit requirements	64
6.8	Remote input/output station (RIOS) requirements	65
6.8.1	General	65
6.8.2	Verification of local and remote I/O stations	65
6.9	Peripherals (PADTs, TEs, HMIs) requirements	66
6.9.1	General	66
6.9.2	Verification of peripheral (PADTs, TEs, HMIs) requirements	67

7.1	General	68
7.2	Emission requirements	70
7.3	EMC immunity requirements	71
7.3.1	Immunity levels	71
7.3.2	Voltage dips and interruptions power ports	77
7.4	Requirements for information on EMC installation	78
8	Marking requirements and information to be provided by the manufacturer	78
8.1	Verification	78
8.2	General marking requirements	78
8.2.1	Minimum marking requirement	78
8.2.2	Functional identifications	79
8.2.3	Functional earth terminals markings	79
8.2.4	Documentation markings	79
8.3	Information format and content	79
8.3.1	Information format	79

8.3.2	Information content.....	80
8.3.3	Information on compliance with this standard.....	80
8.3.4	Information on shipping and storage	80
8.3.5	Information on a.c. and d.c. power supply.....	80
8.3.6	Information on digital inputs (current sinking)	81
8.3.7	Information on digital outputs for alternating currents (current sourcing)	81
8.3.8	Information on digital outputs for direct current (current sourcing).....	82
8.3.9	Information on analog inputs.....	82
8.3.10	Information on analog outputs	84
8.3.11	Information on communication interfaces.....	86
8.3.12	Information on main processing unit(s) and memory(ies)	86
8.3.13	Information on remote input/output station (RIOS)	86
8.3.14	Information on peripherals (PADTs, TEs, HMIs).....	87
8.3.15	Information on self-tests and diagnostics	87
8.4	Information on EMC installation	88
8.5	Information on reliability.....	88
Annex A (informative)	Temperature derating for altitude	89
A.1	Standard atmosphere modelling.....	89
A.1.1	Ambient temperature	89
A.1.2	Aerostatics equation	89
A.1.3	Air density	90
A.1.4	Radiation.....	90
A.1.5	Derating ratio.....	91
A.1.6	Comparison with IEEE1613	91
Annex B (informative)	Digital input standard operating range equations.....	93
Annex C (normative)	Zone C – EMC immunity levels	94
Annex D (normative)	Legacy techniques that are out-dated and not recommended for new design	97
D.1	Background	97
D.2	Ambient temperature	97
D.3	Type 2 digital input	97
D.3.1	Definition	97
D.3.2	Background	97
D.4	Analog inputs.....	98
D.5	Analog outputs.....	99
D.6	CRT displays	99
Annex E (informative)	Application reasoning for a.c. and d.c. interruptions	101
Annex F (normative)	Digital I/O: Current-sourcing input and current-sinking output.....	102
F.1	Digital I/O (negative logic).....	102
F.2	Function and verification	104

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**INDUSTRIAL-PROCESS MEASUREMENT AND CONTROL –
PROGRAMMABLE CONTROLLERS –****Part 2: Equipment requirements and tests**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61131-2 has been prepared by subcommittee 65B: Measurement and control devices, of IEC technical committee 65: Industrial-process measurement, control and automation.

This fourth edition cancels and replaces the third edition published in 2007. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) removal of safety requirements and instead pointing to IEC 61010-2-201;
- b) addition of negative logic digital inputs and outputs;
- c) addition of Type 3-d digital input;
- d) addition of 2,7 GHz to 6 GHz requirement for Radio-frequency electro-magnetic amplitude modulated immunity;

- e) clarification of temperature testing;
- f) clarification of type testing;
- g) deprecation of certain technologies;
- h) general update of multiple aspects of functionality and EMC;
- i) reorganization of clauses to associate requirements and verifications more closely.

The text of this standard is based on the following documents:

FDIS	Report on voting
65B/1083/FDIS	65B/1091/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 61131 series, published under the general title *Industrial-process measurement and control – Programmable controllers*, can be found on the IEC website.

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

IEC 61131-2 is part of a series of standards on industrial control equipment, including programmable controllers, and their associated peripherals and should be read in conjunction with the other parts of the series. However, it can be read and applied alone.

Where a conflict exists between this and other IEC standards, the provisions of this standard should be considered to govern in the area of industrial control equipment, including programmable controllers, and their associated peripherals.

This standard defines for industrial control equipment the following:

- Testing and verifications methods (Clause 4);
- Operating conditions (5.2);
- Temperature and climatic tests (5.2.1);
- Mechanical requirements and tests (5.3);
- Functional requirements and tests for power supplies, I/Os and other components (Clause 6);
- EMC requirements and tests (Clause 7);
- Marking and documentation requirements (Clause 8).

Product safety requirements for PLC and the other types of industrial control equipment now in the scope of this standard are specified in IEC 61010-2-201, which replaces the requirements of Clauses 11 to 14 of IEC 61131-2:2007.

The operating conditions and the temperature derating for altitudes are aligned with IEC 61010-2-201:–1.

¹ Under preparation. Stage at the time of publication: IEC /CDV 61010-2-201:2016.

INDUSTRIAL-PROCESS MEASUREMENT AND CONTROL – PROGRAMMABLE CONTROLLERS –

Part 2: Equipment requirements and tests

1 Scope

This part of IEC 61131 specifies functional and electromagnetic compatibility requirements and related verification tests for industrial control equipment of the following types:

- programmable controllers (PLC);
- programmable automation controller (PAC);
- remote I/O;
- programming and debugging tools (PADTs);
- industrial PC (computers) and industrial panel PC;
- displays and human-machine Interfaces (HMI) for industrial use;
- distributed control system (DCS), and DCS components that are listed here in the scope;
- any product where the primary purpose is performing the function of industrial control equipment, including PLC and/or PAC, and/or their associated peripherals which have as their intended use the control and command of machines, automated manufacturing and industrial processes, e.g. discrete, batch and continuous control.

In this document “control equipment” is equivalent to “industrial control equipment” as are PLC and PAC.
