## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Packaging Institute (JPI)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS Z 0201:1989** is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.

# Methods of designating on component parts and points of containers when testing

## Introduction

This Japanese Industrial Standard has been prepared based on **ISO 2206** : 1987, Edition 2, with some modifications of the technical contents made for the purpose of enhancing usability.

The vertical lines on both sides and dotted underlines indicate changes from the corresponding International Standard. A list of modifications with the explanations is given in Annex JA.

## 1 Scope

This Standard specifies a system for identifying parts of transport packages and containers when testing.

**NOTE** : The International Standard corresponding to this Standard and the symbol of degree of correspondence are as follows.

ISO 2206 : 1987 *Packaging — Complete, filled transport packages — Identification of parts when testing* (MOD)

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and **JIS** are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21-1**.

## 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this Standard. The most recent editions of the standards (including amendments) indicated below shall be applied.

JIS Z 0102 *Kraft paper sacks — Vocabulary and types*

JIS Z 0104 *Glossary of terms used in corrugated fibreboard industry*

JIS Z 0108 *Packaging — Vocabulary*

## 3 Terms and definitions

For the purposes of this Standard, the terms and definitions given in **JIS Z 0102**, **JIS Z 0104**, and **JIS Z 0108** apply.

## 4 Identification of parts of packages

The transport package or container shall be placed in the position in which it is normally transported. Identification of parts of the transport packages and containers of different shapes shall be as given in the following. If the orientation of the content
