About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

CONTENTS

FOREWORD.....	6
1 Scope.....	8
2 Normative references	9
3 Terms and definitions	9
4 Specification of the function.....	13
4.1 General.....	13
4.2 Input energizing quantities / energizing quantities	13
4.3 Binary input signals.....	14
4.4 Functional logic.....	14
4.4.1 Operating characteristics	14
4.4.2 Reset characteristics	17
4.5 Additional influencing functions/conditions	18
4.5.1 General	18
4.5.2 Specific characteristics for under/over frequency function.....	18
4.5.3 Specific characteristics for rate of change of frequency (ROCOF) function	19
4.6 Binary output signals	19
4.6.1 General	19
4.6.2 Start (pick-up) signal	19
4.6.3 Operate (trip) signal.....	19
4.6.4 Other binary output signals.....	19
5 Performance specification	20
5.1 General.....	20
5.2 Effective and operating ranges.....	20
5.3 Accuracy related to the characteristic quantity	21
5.4 Start time for under/over frequency function.....	21
5.5 Start time for rate of change of frequency (ROCOF) function	21
5.6 Accuracy related to the operate time delay setting	22
5.7 Disengaging time	22
5.8 Reset hysteresis and reset ratio.....	22
5.9 Accuracy related to restraint/blocking elements	23
5.10 Performance with harmonics	23
5.11 Stability in case of sudden voltage change (phase shift and magnitude shift).....	23
5.12 Voltage input requirements	23
6 Functional test methodology	24
6.1 General.....	24
6.2 Determination of steady state errors related to the characteristic quantity	26
6.2.1 Accuracy of the start value	26
6.2.2 Reset hysteresis or reset ratio determination	32
6.3 Determination of the start time	41
6.3.1 General	41
6.3.2 Under/over frequency	41
6.3.3 Rate of change of frequency	47
6.4 Determination of the accuracy of the operate time delay	50
6.4.1 General	50
6.4.2 Description of test method	50
6.4.3 Reporting of the operate time delay accuracy	52

6.5	Determination of disengaging time	53
6.5.1	General	53
6.5.2	Under/over frequency	53
6.5.3	Rate of change of frequency	56
6.6	Performance with harmonics	58
6.6.1	General	58
6.6.2	Accuracy of the under/over frequency start value in the presence of harmonics	58
6.6.3	Accuracy of the ROCOF start value in the presence of harmonics	63
6.7	Stability in the case of sudden voltage change (phase shift and magnitude change)	65
6.7.1	General	65
6.7.2	Performance in case of voltage phase shift and magnitude change	65
6.7.3	Performance in case of voltage magnitude drop and restoration	68
7	Documentation requirements	70
7.1	Type test report	70
7.2	Other user documentation	71
Annex A (normative)	Test signal equation with constant frequency variation (df/dt)	72
Annex B (normative)	Calculation of mean, median and mode	73
B.1	Mean	73
B.2	Median	73
B.3	Mode	73
B.4	Example	73
Annex C (informative)	Example of frequency measurement and calculation	74
C.1	Definitions	74
C.2	Signal observation model	74
C.3	General requirements on frequency measurement	76
C.3.1	General requirements on frequency measurement	76
C.3.2	Periodic algorithm	76
C.3.3	Analysis algorithm	78
C.3.4	Error minimization algorithm	79
C.3.5	Discrete Fourier transformation (DFT)	82
Annex D (informative)	Performance with inter-harmonics	84
D.1	General	84
D.2	Proposed test: accuracy of the under/over frequency start value	84
D.2.1	Description of the generated frequency ramp	84
D.2.2	Protection function settings	85
D.2.3	Test points and calculation of frequency accuracy in the presence of inter-harmonics	86
D.2.4	Reporting of frequency accuracy in the presence of inter-harmonics	86
Annex E (informative)	Management of sudden frequency change without discontinuity in voltage waveform	87
	Bibliography	90
	Figure 1 – Operate time and operate time delay setting	11
	Figure 2 – Simplified protection function block diagram	13
	Figure 3 – Underfrequency independent time characteristic	15
	Figure 4 – Overfrequency independent time characteristic	16

Figure 5 – ROCOF independent time characteristic (for negative or positive ROCOF).....	16
Figure 6 – Explanatory diagram for start, operate, disengage and reset.....	18
Figure 7 – Example of test method for overfrequency	26
Figure 8 – Example of test method for positive ROCOF function	29
Figure 9 – Frequency ramps for assessing the reset hysteresis for overfrequency functions.....	33
Figure 10 – Frequency ramps for assessing the reset hysteresis for underfrequency functions.....	33
Figure 11 – Test method for measurement of reset value for ROCOF functions: example for positive ROCOF function	37
Figure 12 – Start time measurement of overfrequency with sudden frequency change	42
Figure 13 – Start time measurement of overfrequency with constant slope frequency ramp	43
Figure 14 – Example of start time reporting for under/over frequency protection function.....	47
Figure 15 – Start time measurement of positive ROCOF function.....	48
Figure 16 – Histogram for the start time test results for ROCOF.....	50
Figure 17 – Operate time delay measurement of overfrequency and positive ROCOF	51
Figure 18 – Disengaging time measurement of overfrequency with sudden frequency change.....	54
Figure 19 – Disengaging time measurement of overfrequency with constant slope frequency ramp.....	54
Figure 20 – Disengaging time measurement of ROCOF	56
Figure 21 – Histogram for the disengaging time test results for ROCOF.....	58
Figure 22 – Example of an increasing pseudo-continuous ramp for overfrequency functions.....	59
Figure 23 – Voltage signal with superimposed harmonics	61
Figure 24 – Representation of the input energizing quantity (voltage, RMS) injection sequence.....	67
Figure 25 – Representation of the input energizing quantity (voltage, RMS) injection sequence with the power system frequency values	69
Figure C.1 – Zero-crossing algorithm	77
Figure C.2 – Level-crossing algorithm.....	77
Figure D.1 – Example of an increasing pseudo-continuous ramp for overfrequency function.....	84
Figure E.1 – Example of voltage waveform without discontinuity at $t_0 = 0,02$ s.....	88
Figure E.2 – Example of voltage waveform with discontinuity at $t_0 = 0,02$ s	89

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MEASURING RELAYS AND PROTECTION EQUIPMENT –**Part 181: Functional requirements for frequency protection****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60255-181 has been prepared by IEC technical committee 95: Measuring relays and protection equipment.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
95/402/FDIS	95/409/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60255 series, published under the general title *Measuring relays and protection equipment*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

MEASURING RELAYS AND PROTECTION EQUIPMENT –

Part 181: Functional requirements for frequency protection

1 Scope

This part of IEC 60255 specifies the minimum requirements for functional and performance evaluation of frequency protection. This document also defines how to document and publish performance test results.

This document covers the functions based on frequency measurement or rate of change of frequency measurements. This document also covers frequency protection where additional blocking elements are used.

This document defines the influencing factors that affect the accuracy under steady state conditions and performance characteristics during dynamic conditions. The test methodologies for verifying performance characteristics and accuracy are also included in this document.

The frequency functions covered by this document are shown in Table 1:

Table 1 – Frequency protection designation

	IEEE/ANSI C37.2 function numbers	IEC 61850-7-4 logical nodes
Underfrequency protection	81U	PTUF
Overfrequency protection	81O	PTOF
Rate of change of frequency protection (ROCOF)	81R	PFRC

This functional document is applicable to frequency functions embedded in a protection relay but also to other physical devices which include frequency protection in their functionality (for example, trip units in a low-voltage circuit breaker or inverters associated with photovoltaic or storage systems).

This document does not cover synchronizing or synchronism-check functions.

This document does not specify the functional description of additional features often associated with frequency functions such as undervoltage blocking, df/dt or $\Delta f/\Delta t$ supervision, current supervision or power supervision (f/P function). Only their influence on the frequency protection function is covered in this document.

Frequency and rate of change of frequency measurement outputs provided by protection devices are not in the scope of this document.

Additionally, this document does not explicitly cover the frequency relays based on current as the input energizing quantity but the principles covered by this document can be extended to provide guidance for these applications.

The general requirements for measuring relays and protection equipment are defined in IEC 60255-1.
